

### HAP HANGER SMALL

Rounded edges for safe installation. No sharp surfaces.

All HAP Hangers are concentric. For jobs that require pipe size reduction, pipes are always on center.

Tempered spring steel allows pipes to easily snap into the bracket during installation.

Fast and easy installation. Installs with two screws using a cordless drill/driver.

Durable power coated finish for indoor or outside applications.

Combines the pipe hanger and stud guard protection in one product for vertical or horizontal installations.

Provides a gap between the mounting surface and the pipe.

KEEP OUT OF REACH OF CHILDREN.

#### Common Applications

HAP System pipe brackets are designed to hold & protect pipes securely and provide protection from nails or screws penetration.

Contact HAP System for applications not specifically referenced above.
