## THE RAMP

---

### WHY BECOME A HAP SYSTEM PRODUCTS DISTRIBUTOR?

We know you're looking for products that not only meet but exceed industry standards, creating strong sales opportunities for you. That's where the HAP System Pipe Hangers come in—innovatively designed for professionals seeking reliability and efficiency.

---

### WHAT IS HAP SYSTEM BY DOMINICK GERACI

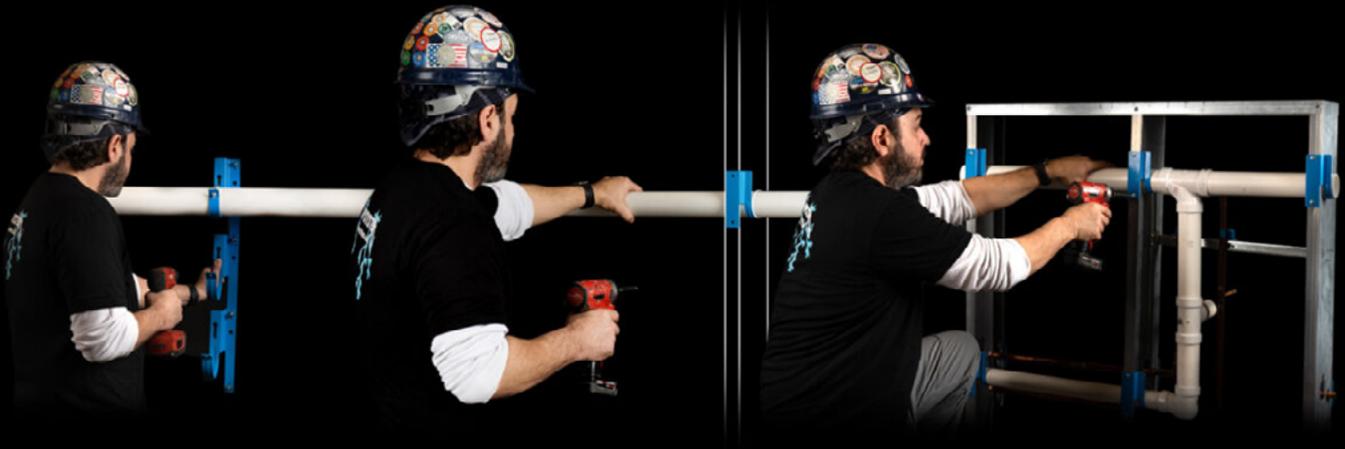

A straightforward explanation of one of HAP System's customers: This customer incorporates our products into every construction project within his approximately \$100M property portfolio. He understands the significance of saving money the right way!

---

## HAP STANDS FOR

## WHAT DOES HAP DO

Designs and manufactures the world's most advanced pipe support and protection system. All HAP System products are versatile and multiuse, offering a wide range of applications, whether inside or outside the wall. Our concentric design eliminates the need for time-consuming offsets, while our powder-coated spring steel hangers allow for quick, secure installation on any pipe material.

Most importantly, our products are built to last. We're committed to delivering top quality solutions that our clients—homeowners and business owners alike—can rely on.

## WHY HAP HANGERS

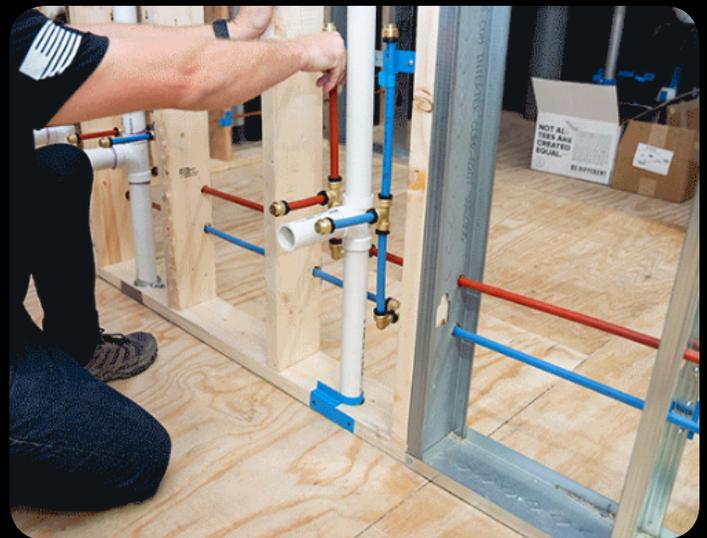

**Saves Time:** Achieve hanger installation in just 10 seconds with our easy snap-on method.

**Saves Money:** Cuts down project time, giving contractors reliable, proven support.

**Versatile Application:** Compatible with Copper, CPVC, PEX, SDR, Cast Iron, Stainless Steel, and more.

**Quality Build:** Crafted from 100% tempered spring steel for small and medium hangers, and low-carbon steel for large ones. Each hanger is powder-coated for durability, IAPMO R&T 'cUPC' certified, and meets SGS 500V Dielectric Withstand standards.

**Enhanced Safety:** HAP System products are designed without sharp edges, minimizing the need for extra tools.

---

## **WHY RECTORSEAL AND HAP SYSTEM**

HAP System is an innovative company that has done tremendous work, proving that the “HAP” Hold And Protect system has a place in an industry that doesn’t change easily. We both understand the need for innovation, but we also stay focused on the main goal – customer satisfaction.

---

## FAST EXECUTION AND PROVIDING CONSIS- TENT RESULTS EVERY TIME

We could write a book about delays and never-ending repairs after work is done. Instead, we focus on providing the best possible methods out there. When people tell us they're super busy, it often comes with the headache of something not being done correctly in the first place. We do have time, and we help our customers understand that. Quality and customer satisfaction matter the most, and that's the energy we bring to the table!

---

# DELAYS, NEVER-ENDING REPAIRS AND DRIVING OUR CUSTOMERS CRAZY IS BAD BUSINESS

Together, we have the power to change this. Let's offer better products with better installation methods.

Let's be an example of this change. Here's the solution: HAP System. Do it right the first time!

Additional testimonials from real customers, showcasing their expressions about the problems they faced and the solutions we provided.

## HOW MANY DIFFERENT PRODUCTS DOES HAP SYSTEM OFFER?

We offer 18 different hangers in sizes ranging from 1/2" to 6". Our selection includes two sizes of stud guards, the HAP Bullet filler for maximizing multiple pipe drops from the ceiling, two sizes of telescopic mounting braces, the Easy Plug for water outlet testing, and a carrier bridge accessory suitable for any pipe hanger application to support pipes, water meters, RPZs, and other devices. We also offer a universal clip for plumbing and HVAC pipe transitional securement, including a carrier clip for expansion safety tanks. And there's much more to come!

## HAP SYSTEM SAVES TIME, MONEY, AND REPRESENTS MUCH MORE

Satisfaction, quality, versatility, assurance, safety, and reliability—HAP System products offer it all. Each product is designed for multi-use, and it's time to bring this quality to every corner of the U.S., restoring excellence to our homes and businesses!
